Notes: Medical History and Consent for Treatment
I certify that the above information is accurate, complete and true.
I authorize Advanced Nerve & Health Center DFW and any associates, assistants, and other health care providers it may deem necessary, to treat my condition. I understand that no warranty or guarantee has been made of a specific result or cure. I agree to actively participate in my care to maximize its effectiveness.
I give my consent for Advanced Nerve & Health Center DFW to retrieve and review my medication history. I understand that this will become part of my medical record. I acknowledge that I have had the opportunity to review Advanced Nerve & Health Center DFW's Notice of Privacy Practices, which is displayed for public inspection at its facility. This Notice describes how my protected health information may be used and disclosed, and how I may access my health records.
I authorize the Advanced Nerve & Health Center DFW to release my Protected Health Information (medical records) in accordance with its Notice of Privacy Practices. This includes, but is not limited to, release to my referring physician, primary care physician, and any physician(s) I may be referred to. I also authorize Advanced Nerve & Health Center DFW to release any information required in obtaining procedure authorization or the processing of any insurance claims. I understand that Advanced Nerve & Health Center DFW will not release my Protected Health Information to any other party (including family) without my completing a written "Patient Authorization for Use and Disclosure of Protected Health Information" form, available at its facility.

What is Neuropathy?

Approximately <u>20 million Americans</u> are living with peripheral neuropathy. While the term "neuropathy" simply means "nerve damage," peripheral neuropathy is the impairment of the nerves in the body's outer extremities -- such as the hands and feet. While the explanation for an individual's neuropathy is sometimes unknown, a wide range of factors can cause it. Here are some causes of this chronic neurological disease.

- Trauma from injury and repetitive stress is the most common cause, and medical treatments, like certain types of chemotherapy and surgeries, can damage nerves.
- Nearly 70 percent of people with diabetes live with some level of neuropathy.
- Inflammation from autoimmune diseases like lupus and rheumatoid arthritis can destroy nerve fibers.
- The majority of people on dialysis for kidney disease develop neuropathy because excess toxic chemicals accumulate and damage nerves.
- Infections, both bacterial and viral, are a major cause of neuropathy.
- Heavy drinking can cause nerve damage.

Does Insurance Cover My Potential Treatment Plan?

The simple answer is 'no.' But it is NOT that simple.

Our treatment, even though backed by years of clinical research, clinical outcomes and FDA approved, major medical insurance companies continue to hold back on supporting non-invasive care that doesn't involve pharmaceutical drugs, surgeries and unnecessary expenses.

Our patients are faced with deciding 'what is my health worth?'

They simply haven't caught up to our valuable and innovative area of expertise, but we're trying. We have found options to help our patients take on the financial weight. But let's be honest, that term 'out of pocket' or 'not covered by insurance' can be scary, but the real fear is obvious, and that is but 'WILL THE TREATMENT WORK?!'

The only true way to know is to educate yourself and find the answers for your specific issue. I urge you to be assessed properly and find out your treatment options. There is a chance we may not be able to help. In fact, 1 in 3 patients cannot be treated. But you will know this immediately after your consultation and diagnostics.

Because we have years of success in treating our patients by regenerating and rejuvenating nerves and reliving nerve related pain; it's our continued mission to educate, innovate and treat all those that suffer from neuropathy.

Insurance coverage should never dictate your quality of life.

PATIENT FINANCING: Every Patient Is Approved

What You Need to Know Before Your In-Office Neuropathy Consultation

During your consultation, your Doctor and/or Nurse will spend whatever time is necessary to respond to your questions and address all your concerns. He or she wants to make sure you have all the information you need to make an informed decision on the personalized neuropathy treatment plan, with realistic expectations about the outcome.

Finally, you will be informed about available treatment dates that will accommodate your schedule. You will also meet with your patient advocate to discuss the investment involved in your treatment plan.

We have found options to help our patients take on the financial obligation, along with providing incentives and savings opportunities. If you wish to try financing, please fill out the following information. Please note: **We will not proceed with any financing until you have all your options.** The choice is always yours.
